

GREENER GREENS THROUGH THE END OF A HOSE

Every golf course superintendent knows that without proper irrigation there's little point in teeing up the first ball. But few consider the bigger role that water plays - or rather could play - in promoting healthier, greener, more resilient greens.

HYDROGRO™ is a simple but revolutionary approach to promoting turf health.

BEFORE

AFTER (2 Weeks)

To understand more about how we assist you in improving your turf care in a holistic way while saving you money at the same time, we invite you to read the following short Q&A on the following page:

Q: How does it work?

A: HYDROGRO™ is based on the scientific principle that a healthy plant with undamaged foliage is more resistant to external agents and can devote more energy towards growth and seed production. HYDROGRO™ disinfects and conditions irrigation water to rapidly boost overall turf health. It does not replace traditional pesticides, fungicides or bactericides and should not be considered or used as a complete substitute. However evidence has shown that the ongoing application of HYDROGRO™ will reduce the overall consumption of traditional chemicals over time. HYDROGRO™ leaves no problematic or restricted residues, is non-phytotoxic and not harmful animals or humans.

Q: How is it applied?

A: HYDROGRO™ is supplied in disposable refill cartridges that are inserted into a simple in-line dispensing device. The system can be quick-connected to any standard garden hosepipe or even incorporated into automated irrigation equipment.

Q: How do I know I'll get the results I want?

A: Our Company has been involved in water treatment, food sanitation and pre- and post-harvest disinfection for over 40 years. We're also a listed vendor to institutions such as the US Army, major international NGOs and mass merchant retailers in Africa and Australia and so we're confident that you'll never regret the decision to try HYDROGRO™ on your greens and turf. In fact, we're so confident that if you don't believe HYDROGRO™ has improved your turf management in any way we'll happily refund your money*.

Q: How and where can I buy?

A: Just contact us at the links below and we'll get you started without delay. No matter where in the world you are we can send you a HYDROGRO™ Start Up Kit at short notice by air or land.
